

Collonil Aviation Leather and Surface Cleaner and Care Products

Leather care

Leather seats and trim are an investment in high quality passenger accommodation, which enhances the travel experience. This investment should be protected using the highest quality conditioning materials that protect the leather from staining/damage and make surface cleaning easier. Surface cleaning should be carried out using the highest quality approved materials, which remove marks and stains without damaging the leather. Collonil have over 90 years' experience in formulating leather care products. Collonil Aviation products are designed to clean, nourish and protect aircraft leather seats and trim, in the very demanding conditions created during aircraft operation. They recover and prevent dryness, cracking, stress and fatigue. They prolong the life of the leather and maintain its beautiful appearance for years of valuable service. All Collonil products are silicone free and meet aerospace specifications.

Collonil Aviation Leather Cleaner

Description

Cleans all types of stains and marks from aircraft leather seats and trim without damaging the leather. Restores the surface condition and texture of the leather. Marks removed include deeply impregnated dirt, greases, coffee and metal rub marks etc.

Application

Apply evenly onto the leather and spread with a sponge or cloth. Stubborn stains may need a little extra pressure to ensure removal. Wipe surplus cleaner off using a damp sponge or cloth, allow leather to dry.

To protect the leather against future staining, apply a nourishing treatment of Collonil Aviation Leather Care Lotion.

Collonil Aviation Leather Care Lotion

Description

Nourishes and restores leather which has been subjected to cleaning and the damaging conditions found in aircraft operation such as a drying, air-conditioned atmosphere. Protects the leather against staining and makes cleaning easier and less damaging in future.

Application

Spread lotion onto the leather and rub in evenly with a microfibre cloth, repeating as necessary depending on the absorption of the leather. Allow a short period for drying. Smooth leather can be polished with a microfibre cloth after treatment, for a pleasing shine.

Collonil Aviation Clean and Go Wipes

Description

High quality cloths, pre-impregnated with a generous amount of Collonil Aviation Leather Cleaner, for quick, effective cleaning on the move. Suitable for turn-round or in flight cleaning. One 30cm x 40cm (12" x 16") wipe is sufficient to clean 3-4 standard aircraft seats.

Application

Clean the leather surface with the cloth. The friction will generate foam and dirt particles will be loosened. Removal of heavy soiling will be improved by increasing the pressure applied. Allow to dry and re-polish with a soft cloth.

To protect the leather against future staining, apply a nourishing treatment of Collonil Aviation Leather Care Lotion.

Collonil Aviation Care and Go Wipes

Description

High quality cloths, pre-impregnated with a generous amount of Collonil Aviation Leather Care Lotion. Suitable for quick application after cleaning to nourish the leather and protect against drying and staining in future. One 30cm x 40cm (12" x 16") wipe is sufficient for 3-4 standard aircraft seats.

Application

Apply to the leather in circular movements with a slight pressure. Let the nourishing formula soak into the leather and allow to dry. Smooth leather can be polished with a microfibre cloth after treatment for a pleasing shine.

Collonil Aviation Leather Care Set

Description

The perfect set to keep on board the aircraft to deal with cleaning and care requirements whilst operating. The holdall style bag contains a 150 ml trigger spray each of Collonil Aviation Leather Cleaner and Leather Care Lotion, together with a sponge and a microfibre cloth.

Application

Use as described above for each product, keep the set topped up with new trigger sprays ordered separately.

Aircraft Leather Seats Before and After Cleaning with Collonil Leather Cleaner

Aerospace Approvals

Collonil Leather Cleaner and Care Lotion have been tested to and meet the requirements of

ABD0031 Issue E
JAR 25.853 Appendix F (a) (1) (ii)
Boeing D6-17487
ASTM F483

Collonil Quality Cleaners for Textiles and Surfaces

Clean and Care Foam

Universal cleaning foam for textiles and material combinations. Deeply ingrained dirt will be completely removed. Press bottle trigger and apply the foam to a cloth. Wipe the surface with the cloth in circular movements. Some pressure can increase the cleaning effect on severely soiled spots.

Cockpit Spray

Collonil Cockpit spray is a top quality cleaner trigger spray for all plastic and veneer surfaces, leaving a perfect matt sheen. It cleans efficiently without damaging the surface. The anti-static formula prevents dust build up on cleaned surfaces. Collonil Cockpit Spray has a pleasant cedar-wood fragrance and is silicone free.
